

JUSTWORX

Codeless IoT that just works

As a leader in Cellular Edge processing technologies, Justworx is reliant on affordable, secure and flexible global cellular communications. Since our Edge processors only consume tiny amounts of data (compared to cloud based IoT systems) we pass that spare cellular data capacity on to you at prices that nobody else can match.

Countries for roaming

Ultimate flexibility for Global IoT and M2M coverage.

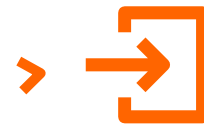

Multi-Network

Our sims are non-steering so they always connect to the strongest network.

Scan for Global Coverage

Client Portal

Easily manage all your Sims on our client portal.

Top up anytime

If you need more data, it's easy to top up manually or by setting an auto-topup threshold. Top-up data rolls over for 12 months!

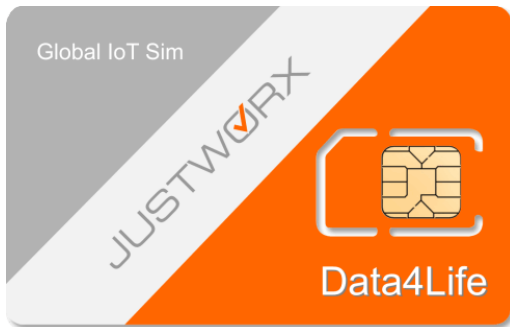

Ultra Secure

Free access to a secure APN with optional IPsec VPN tunneling.
