Features

- Each RoboGuard senses the presence of an intruder at 20 meters in an arc of 110°.
- Housed in high pressure moulded Poly-Carb abs blend provides a robust weather proof protection.
- Anti-tamper switch protects RoboGuard even when it is switched off.
- U.H.F. surface acoustic wave resonator ensures “spot on” reliable radio communication through walls and steel structures.
- Resident buzzer makes user diagnostics and setting up child’s play.
- Algorithm selection for intruder detection completely eliminates false alarms. Choose from a selection of algorithms to cater for: extreme weather large birds etc.
- Lenses made with Poly IR6 a U.S. patented material and carry a 10 year warranty against ultra-violet damage.
- 30 micro-amp current consumption 8xC type batteries give extended life (3-5 years typically)
- Due to wireless nature totally impervious to lightning.
- Two Dual-Element Passive Infra-Red Sensors
- The Ultimate Wireless Early Warning System
